### **Cannuflow to Exhibit at 24<sup>th</sup> Annual Esch San Diego Shoulder Arthroscopy Conference**

#### **Will Show Latest Anti-Extravasation System Solution for Shoulder Arthroscopy**

**SAN JOSE, Calif. – June 11, 2007** – Cannuflow Inc., a leading developer and supplier of state-of-the-art fluid management devices for shoulder, knee and hip arthroscopy, today announced that the company will be exhibiting at the 24<sup>th</sup> Annual Esch Shoulder Arthroscopy Meeting in San Diego, California.

Representatives from Cannuflow will be located at booth #37 and will be available to share best practices for arthroscopy fluid management and to discuss recent case studies involving their latest products.

Cannuflow's booth will showcase its new anti-extravasation cannulas, *EntreVu EX* and *TwoVu Ex*, which have already received considerable press acclaim for their innovation and simplicity of operation. A breakthrough in instrument cannula design for shoulder arthroscopy, *EntreVu* is the first to also actively drain extravasating joint fluids, visibly reducing swelling of interstitial tissue.

The *TwoVu EX* integrates Cannuflow's patented anti-extravasation technology (*Extravastat* technology) into its popular line of *TwoVu* scope sheaths, introduced in 2005. A soft polymer, low-profile device, *TwoVu* slips over a scope's own sheath (fits sizes from 5.8mm to 6.3mm) to provide a dedicated outflow channel from the joint space as well as a completely separate channel for draining extravasating joint fluids.

Minimizing extravasation may reduce some of the complications typically associated with shoulder arthroscopy, as well as help to ensure the surgeon has the time necessary to complete the procedure arthroscopically.

*EntreVu EX instrument cannula, the first to offer anti-extravasation capabilities.*

*TwoVu EX scope sheath, the first to offer both fluid inflow/outflow and anti-extravasation capabilities.*

Cannuflow, Inc., 1190 Coleman Ave., Ste. 250, San Jose, CA 95110

Held at the Hyatt Regency La Jolla in San Diego, California, from June 20 – 23, the 24th Annual Esch Shoulder Arthroscopy Meeting will feature lectures, labs and -breakout sessions instructing surgeons on the latest shoulder arthroscopy techniques and treatments. The conference will also feature exhibits from all the leading arthroscopy medical equipment manufacturers.

### **About Cannuflow**

A privately held Silicon Valley-based company, Cannuflow develops, manufactures and markets specialty arthroscopy medical products that deliver innovative solutions to the chronic arthroscopic fluid-management problems of flow, visibility and extravasation. Designed to enhance procedure efficiency and safety, the company's ClearVu™, TwoVu™ and Extravastat™ (EntreVu™ EX and TwoVu EX) devices easily integrate into surgeons' existing surgical techniques. For more information on Cannuflow and its complete line of products, visit the Cannuflow website at [www.cannuflow.com](http://www.cannuflow.com).
